## Purpose of the DYN@MO Summer University

### General aim of the DYN@MO Summer University concept

Structured learning and building of professional competences in sustainable urban mobility is a major aim of the CIVITAS DYN@MO project. To promote European level exchange and learning about CIVITAS themes, the project is offering three sessions of the DYN@MO Summer University. The target groups of the Summer University are students and young professionals, as well as mid-career employees and selected decision makers working on sustainable urban mobility.

The sessions are being organised by the Universitat de les Illes Balears in 2013, 2014 and 2015. The University offers an excellent infrastructure for holding summer courses and dedicated University staff ensure effective delivery of such courses. The easy access with many direct plane connections to many European countries makes Palma a suitable destination for urban transport professionals. Each of the sessions lasts for three days and focuses on one of the three challenges of the CIVITAS DYN@MO project:

- Engaging in a dynamic dialogue for SUMP development (2013) (documentation is available from: [http://gitmot.uib.es/USB\\_Summer\\_University/START.html](http://gitmot.uib.es/USB_Summer_University/START.html));
- Implementing city and citizen friendly electric vehicles (2014) (documentation is available from <http://gitmot.uib.es/SummerUniversityII/SU2014.html>);
- Developing “Mobility 2.0” systems and services (In November 2015).

The University partners, competence centres and measure leaders of the CIVITAS DYN@MO project provide the content of the courses. In addition international experts are invited to contribute to each of the courses. To make the courses accessible to Spanish speaking young professionals and students, the University provides simultaneous translation for the first and second day which is held in English. The courses during the third days will be held only in Spanish.

### Specific aim of the 3<sup>rd</sup> DYN@MO Summer University in Palma, November 2015

- To give a practical overview about 2.0 Mobility aspects to project partners and associates;
- To involve students and young professionals in the knowledge of 2.0. mobility tools.
- To engage stakeholders and citizens to new forms of public participation using the possibilities offered by social media and web 2.0.

## Concept of the 2015 DYN@MO Summer University in Palma

The Third Summer University will be held on 4-6 November 2015.

The main language of the first and second day is English. Those days simultaneous interpretation between Spanish and English will be provided.

The third day will be in Spanish. There will be no interpretation.

### Outcomes of the Summer University

The Summer University 'students' will gain new information and knowledge from transport researchers and professionals on implementing 2.0 Mobility tools in sustainable mobility planning. A certificate of attendance at the end of the DYN@MO Summer University will declare that the 'students' have acquired basic knowledge about requirements of topic.

## Practical information

Palma is the major city geographically located in the south-west of Mallorca, in the western Mediterranean Sea. Also, Palma is the capital city of the autonomous community of the Balearic Islands in Spain.

### How to get to Palma?

Palma has excellent air links with the mainland, the major European cities and the rest of the world. The international airport of Son Sant Joan, 8 km from the city of Palma is the main gateway to the island of Mallorca.

### Connection between the airport and Palma

**Bus:** EMT's line 1 connects Palma airport to the city centre. It leaves from the airport in front of the arrivals building. The trip lasts 20 minutes and you can only pay cash (2.50€). It will bring you to Plaça d'Espanya bus stop, Palma's major hub and intermodal station.

#### Timetables

**Workdays, Saturdays and holidays: Average frequency: 13 minutes**

■ **Aeropuerto** Earliest departures: 06:00, 06:15, 06:35, 06:57 last departures: 00:15, 00:45, 01:15, 01:45

Languages: Spanish, Catalan, English

Taxis are adapted for the disabled. Payment possible with credit card.

### Getting around in Palma:

**EMT** (Municipal Transport Company) is the local bus company. Tickets must be purchased for every journey. If you need to transfer buses you must buy another ticket. Bus tickets can be purchased at local kiosks.

**Sa Riera:** line 8, stop Instituts. Average frequency: 7 m.

**University:** line 19, stop Edifici Beatriu de Pinós. Average frequency: 16 minutes.

Ordinary rate - urban ticket: 1.50€

**Sa Riera:** Address: c/ de Miquel dels Sants Oliver 2, Palma

#### Weather

Mallorca's climate is typically Mediterranean, with warm average temperatures and seasonal rains, the summer period being both hot and dry. The island's rainfall is characterised by its irregularity, varying radically from one year to the next, even reaching the point where there are drought conditions. Most of the rain that falls is concentrated within a few days of precipitation, with some very heavy rains in autumn and lighter rains over the rest of the year.
